One for flat ground, one that levels. 2" Hex Standard Augers 6", 8", 10", 12" Usually in stock. Others: 2-4 weeks Call for more specific information. For a quotation use the QUICK QUOTE form in the tab below, or call us at 800-214-1649.

How does a 3 point tractor work?

The unique system transforms a three-point tractor into a drilling machine capable of doing what the big truck rigs do: drill accurate, straight holes (to a depth of 5 ft on a single auger) in almost any drilling condition including solid rock and concrete. - Rigid frame w/hydraulic down pressure w/relief valve.

What is a PTO driven posthole digger?

Rhino's PTO driven posthole diggers have 6" diameter augers and a three-point hitch to fit Categories 0, 1, or 1-2, depending on the model. The boom and yoke are designed with high strength steel tubing. Shear bolt driveline protection is standard on all models, and the rugged gearbox ensures years of dependable service.

What is a three-position boom Digger?

A three-position boom allows you to adjust this digger according to your terrain so you can modify the angles depending on the type of job you want to do. It easily attaches to most tractors through its 3-point shear pin shaft linkage system that is compatible with Category 1 & 2 hookups and 35-65 HP tractors.

How does a PTO gearbox work?

The gearbox is protected by an automatic torque limiter within the P.T.O. shaft which instantly relieves torque when overloaded and automatically resets itself as soon as P.T.O. speed is reduced. This eliminates troublesome shear pins and downtime because of broken P.T.O. shafts and cross kits.
