

A rig that is actively drilling term

What does active rig mean?

Rig is available and running. Active (Drilling): Bit-on-bottom time - the rig is actively drilling. Active (Productive): Non-drilling activities related to the drilling process (e.g. casing, tripping). Active (Non-Productive): Rig is running but not progressing the hole (e.g. rig moves, stuck rods).

What is the difference between active rig and non-drilling rig?

Active (Drilling): Bit-on-bottom time - the rig is actively drilling. Active (Productive): Non-drilling activities related to the drilling process (e.g. casing, tripping). Active (Non-Productive): Rig is running but not progressing the hole (e.g. rig moves, stuck rods). Rig is available but not running.

What does active rig count mean?

When drilling rigs are active they consume products and services produced by the oil service industry. The active rig count acts as a leading indicator of demand for products used in drilling, completing, producing and processing hydrocarbons.

What are the parts of a drilling rig?

Casing - Steel pipe placed in an oil or gas well to prevent the wellbore from collapsing. Completion - The process of making a well ready for production. Derrick - Tower-like structure that supports the drilling apparatus. Drill Bit - The cutting tool used to create the wellbore. Drill Pipe - Pipe that connects drill bit to the drilling rig.

What does a driller do?

Driller - One who operates a drilling rig; the person in charge of drilling operations and who supervises the drilling crew. Drilling Mud or Drilling Fluid - A special mixture of clay, water, and chemical additives pumped downhole through the drillpipe and drill bit.

What is the difference between a drill rig and a dope?

Dope: A thick lubricant used on pipe connections. Drill string: A column, or string, of pipe that transmits drilling fluid (via the mud pumps) and torque (from the Kelly drive or top drive) to the drill bit. Driller: The crew supervisor on a drilling rig, working under the toolpusher.

Introduction The Drilling Productivity Report (DPR) is a computer model ("DPR model") that estimates recent and future oil and gas production for seven specific regions ("DPR Regions"), ...

Westwood expects full-year 2024 marketed committed utilisation, which considers actively marketed rigs with charters underway or already booked with future start dates, to ...

*Effective June 07, 2019, the Baker Hughes International Rig Count now includes the number of active
