Why do drilling rigs need AC drives?

Easy-access panels make troubleshooting and maintenance easy. AC drives provide clean, consistent power to the drilling rig when compared to SCR drives. Delivering power distribution systems that are highly configurable from the smallest drilling rigs to the largest applications.

What are the different drive modes in a drilling rig?

Drilling rigs can be designed with different drive modes: Electric drive (AC or DC), mechanical drive, or a combination of both (compound drive). In the following we briefly introduce each drive mode as well as list their strengths and weaknesses.

What are the different types of drilling rig power systems?

There are two main types of drilling rig power systems: AC and DC. AC systems use alternating current, while DC systems use direct current. AC systems are more common, but DC systems are becoming more popular due to their efficiency. What are the advantages and disadvantages of each type of drilling rig power system?

How does a mechanical drilling rig work?

On mechanical drilling rigs, also called power rigs, the rotary energy of the diesel engines is transferred directly to the drawworks, mud pumps, and rotary table (or top drive) via a system of chains (chain drive) or belts (belt drive), torque converters and clutches.

What is a drilling rig power system?

A drilling rig power system consists of a prime mover usually a diesel engine, a gearbox, a drawworks, a rotary table, and a mud pump. The prime mover provides power to the gearbox, which in turn drives the drawworks and rotary table. The drawworks is used to raise and lower the drill string, while the rotary table rotates the drill bit.

Who is the largest provider of SCR drives in the drilling industry?

And with an estimated 80% of the installed customer base, we are the largest provider of SCR drives in the drilling industry. For customers looking to change out their DC technology and SCR drives with AC power with variable frequency drives (VFDs), we have a successful track record of installing and commissioning those upgrades.
