

Ams 9600 drill rig manual

What are AMS PowerProbe drill rigs used for?

Mounted on pickup trucks, trailers, UTVs, skid loaders, tractors, or tracks, AMS PowerProbe direct push drill rigs are capable of performing soil, soil gas, and groundwater testing, monitoring, and sampling, as well as conducting a wide variety of geophysical and geotechnical assessments.

What is a 9400 rig?

The 9400 Series is our mid-sized PowerProbe. This track and vehicle mounted rig is compact for limited access areas. While accessing restricted areas, we kept great augering and direct push drilling power in mind. With many choices kept in mind, a key performance option is our hydraulic systems being load sensed.

What is a 9500 series Rig?

The 9500 Series are our high-powered direct-push rigs. These rigs have augering capabilities with operator friendly engineering. With smaller carrier options available, users are allowed access to tighter areas with less footprint. If you're seeking deeper depths and extreme power, our 9500 Series will fulfill those needs and more!

How do I configure a device in AMS Machine Works?

Expand AMS Machine Works -> AMS Asset Monitor Interface and select a device from the list of devices. Click Configure Asset Monitor in the ribbon menu. The Device Configuration application opens in a new browser window. The configuration should be available immediately.

How do I add assets to AMS Machine Works?

You can also do the following from the Asset Explorer utility: Set up your site hierarchy. Add assets to AMS Machine Works for asset sources such as AMS Asset Monitor, Emerson Wireless Gateway, AMS 9420 Vibration Analyzer, AMS Wireless Vibration Monitor, AMS 6500 ATG, AMS Asset Monitor, and Ovation Machinery Health Waveform Recorder.

How do I reload a configuration in AMS Machine Works?

12. Click Save Configuration. If you make changes you do not want to save, click Reload Configuration to start over with the already saved configuration. The Restore Default option is also available which resets the configuration to the default from the device before being added to AMS Machine Works.
