

Big stan drill rig

What is a Big Stan drill rig?

Big Stan is a vehicle-mounted drill rig built in 1986 by Anderson Drilling. The rig has been used on a number of construction projects in which conventional, smaller drilling rigs were unable to be used, particularly when projects call for drilling into hard soil.

Where was Big Stan used?

Notably, Big Stan was used in the construction of the First National Bank Tower in Omaha, the Benicia-Martinez bridge near San Francisco, and on expansions to the I-15 / 215 Beltway in Las Vegas. The drill rig was featured on Discovery Channel's show "Monster Machines" in 2007.

When was Big Stan built?

Big Stan was built in 1986 by Anderson Drilling (Now part of Keller Group PLC) in Lakeside, California. The machine cost \$1.5 million to construct and was named after the company president at the time, Stan Anderson, who was given a similar nickname due to his height of 6 ft 3 in (1.91 m).

The Big Beaver is the most powerful earth drill produced by Little Beaver, the leading manufacturer of torque-free, one-man earth drills. Ideally suited for ...

At KELLER's high speed rail project outside of Selma, CA, we are reaching new heights! BIG STAN is drilling a 15-ft diameter hole for the starter casing, marking a significant ...

Big Stan is a drill rig like no other. Weighing in at 250,000 lb with a mast 90-ft high, it is the largest truck mounted drill rig in the southwest and possibly one of the biggest period.

With its massive diameter and unparalleled force generation, Big Stan can drill through rock, soil, and concrete with ease and precision. Its unique design incorporates ...
