

# Boremaster water well drilling

Can a water well drill rig attach to a skid steer?

There are manufacturers of small water well drilling rigs designed for use in third world countries that claim to have a version that can attach to a skid steer. However, none of them provide any pictures of the skid steer version.

How does a water bore rig work?

Water bore rigs use a small diesel motor to drive the drill rig, while the real work is done by a separate 8V92 powered compressor that supplies air to the percussion boring head and blows the hole clean as it is bored. The new 8V92 compressor is twice as fast as the previous 350 Hp 6V92 compressor.

What type of drill is used to dig a deep well?

The type of drill used to dig a deep well depends on the desired depth and digging conditions. For shallow wells (less than 35'), a bucket hand auger can be used. It's not a fun process but it can be done with less than 300 hp.

Do geothermal well drillers have to be registered?

For open-loop or standing column systems of any depth, ECL &#167;15-1525 requires that the geothermal well driller be registered and all drilling activities be supervised by a person on-site who has taken and passed appropriate exams.

How do I register a water well contractor?

Submission of a NYS Water Well Contractor Registration Form (PDF). The registration form may be completed and submitted online using DEC's online form tool, nForm. A check or money order for the \$10 annual registration fee. All water well activities must be supervised by a person on-site who has taken and passed appropriate exams.
