

Can you own a drilling rig ran drom home

Do oil and gas companies own the land they drill on?

The foundational legal document of the U.S. oil and gas industry is the oil and gas lease. Oil and gas producing companies do not always own the land they drill on. Often, the company (the lessee) leases the mineral rights from the owner (the lessor).

Can a sales guy drill a gas well?

If you find a 'sales guy' willing to drill you a gas well, run away. You have to have permits issued by the state, and own all the mineral rights within the unit. If there was economically produceable gas, there'd probably already be a well on your place.

Can an oil company come on your property?

It's not so good if you only own the surface and none of the minerals. In that case, the oil company has the right to come on your property and conduct activities reasonably necessary to explore for and develop the oil and gas in and under the land. The oil company will not have to share the proceeds of production with you.

Do oil & gas companies install gas wells?

You have to have professional geology work done (which they won't do without being paid by an oil/gas company), contracts/leases, and then the HUGE expense of the drilling rig, rig hands, engineer, etc etc etc. Companies do not "install" gas wells. They drill for oil/gas if there's a chance to make a profit.

Is oil & gas drilling a good idea?

Mr. Bonica has it right. Usually if an inquiry is made about drilling on your property, then you may actually own more than you think. Seek out an oil and gas attorney in your area. It is worth the price. Good luck. Well, it could be good or not so good. It's not so good if you only own the surface and none of the minerals.

Are you dumb about drilling a water well?

You're not dumb. Most folks are familiar with drilling a water well. Oil and gas wells involve different rigs to get to the right depth and all of the other associated equipment such as high volume, high pressure compressor skids; the need for lots of water and a temporary lined pond for the tailings; etc.
