An oil-drilling ship capsized in the Gulf of Suez on 1 July, killing at least four crew members and leaving four others missing, according to Egyptian authorities.

On December 18, 2011, the rig, which was under tow during a fierce storm, capsized and sank in the Sea of Okhotsk. It was being towed by the icebreaker Magadan and the tugboat Neftegaz-55 having just completed an exploration well for Gazprom off the Kamchatka Peninsula. The incident happened some 200 kilometres (120 mi) off the coast of Sakhalin island, in waters more than 1,000 metres (3,300 ft) deep. In terms of operational safety, the towing operation's compliance with be...
