What is a pneumatic rock drill?

A pneumatic rock drill is a kind of percussive drilling machine powered by compressed air. According to the propulsion mode, the equipment can be divided into handheld rock drilling equipment, air leg rock drilling, telescopic upward rock drill, and guide rail rock drilling machine.

What are the advantages of pneumatic rock drilling machine?

With the advantages of simple structure, easy operation, and low price, the pneumatic rock drilling machine is the most widely used rock drilling machine. As a reliable rock drilling machine manufacturer, the pneumatic rock drill for sale in our company is of high quality and we can also guarantee to give every customer the most competitive price.

What are the different types of rock drilling equipment?

According to the propulsion mode, the equipment can be divided into handheld rock drilling equipment, air leg rock drilling, telescopic upward rock drill, and guide rail rock drilling machine. A pneumatic rock drill drives the piston forward in the cylinder with compressed air, which makes the drill bit hit the rock.

What is air leg rock drilling machine?

The air leg rock drilling machine is a kind of equipment that installs the pneumatic rock drill on the air leg for operation. The air leg can support and propel, which reduces the labor intensity of the operator and makes the drilling efficiency much higher.
