What is a CME drilling rig?

CME drilling rigs are mechanically driven multi-purpose machines with an emphasis on auger drilling. Each machine is custom designed to accommodate the drilling needs and preferences of the end user and can be mounted on skids, trailers, trucks, rubber tracks, or rubber tire ATV carriers.

Can a CME 45 drill rig fit a skid mount?

This particular model can accommodate both truck or track skid mounts for increased versatility. Over the years, CME has adjusted the design and updated the drive systems of the 45 drills to improve end-user operation so various versions of the CME 45 drill rig will surface, including the CME-45B and CME-45C.

What is the difference between CME 55 & CME 75 drill rigs?

The CME 55 can be mounted to various styles of trucks or crawler carriers and can be offered under different name variances based on the selected mount such as CME 550 or CME 550X. The CME 75 drill rig is one of CME's larger drill rigs. This unit is known for conquering larger jobs requiring deeper drilling depths or bigger augers.

Can the cme-45c fit my drilling application?

The CME-45C can be configured to fit your specific drilling applications. Performance ratings are based on engineering specifications, calculations and accepted industry standards. Capacities may vary according to drilling conditions. CME reserves the right to amend these specifications at any time, without notice.
