

Coal mine rock drill driver training

What does a coal mine driver do?

Many of the jobs require drivers to haul heavy equipment and transport coal and other materials to and from the mine. Drivers can work as contractors or as full-time employees. According to Info Mine, drivers typically work 12-hour shifts. In addition, drivers may be required to lift heavy objects.

What training does a mine operator need?

Federal law requires that all miners receive basic and annual refresher training, and that all mine operators maintain an effective training plan. MSHA provides materials, guidance, and hands-on assistance to help miners and operators meet their training obligations and more.

How do I become a mine truck driver?

Pass required tests and get your National Occupational Health & Safety qualification certificate. Send a cover letter, your training history, list of references and resume to local mining companies. Schedule a meeting with the on-site supervisor. Discuss interning with the company so that you can gain experience working as a mine truck driver.

What does a mine truck driver do?

Mine truck drivers can gain employment working with domestic and international mining companies. Many of the jobs require drivers to haul heavy equipment and transport coal and other materials to and from the mine. Drivers can work as contractors or as full-time employees. According to Info Mine, drivers typically work 12-hour shifts.

Why are so many coal miners unable to get a job?

Mine shutdowns, lay-offs, and strikes, as well as overall contraction in the coal industry has left many miners and their families struggling to find jobs or training opportunities for new career paths.
