

Core Drilling Rig Geological Exploration Teaching Video

What are the three parts of the core drilling process?

For people who are more visual and who prefer to watch a demonstration than to read about it, these videos are great. This latest video in our series reviews the three parts of the core drilling process: drilling, retrieving the core sample and resuming the drilling. Together they make a round trip and with each one, the bore hole gets deeper.

What is core drilling for mineral exploration?

Take a comprehensive look at core drilling for mineral exploration. Learn how this precise method helps extract valuable geological data, aiding in resource estimation, site evaluation, and informed mining decisions. Mineral exploration aims to discover deposits of minerals and rocks that can be used to meet the resource needs of society.

What is exploratory core drilling?

Exploration core drilling is essential for obtaining actual temperature measurements, rock samples, and retrieving fluid samples for chemical analysis. There are several exploratory drilling techniques and methods in use, depending on the type of deposit and its proximity to the surface.

Why do we need a drill bit for coring a rock?

The core samples are brought up to surface and need to be preserved properly since it undergoes tremendous changes in pressure and temperature, which can result in volatiles escaping from the rock mass or some minerals to rapidly undergo alteration. A special drill bit is used for coring that excavates and preserves a tubular section of rock.

What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

What are the different types of drilling rigs offered by Simco?

With a focus on the specific processes involved in geothermal drilling, geotechnical drilling, and water well drilling, these drilling videos enable you to see the differences between the various drilling rigs offered by SIMCO. A variety of geothermal drilling videos allow you to view Air Rotary DTH Hammer and Mud Rotary drilling.
