What is a crawler water well drilling rig?

The pneumatic crawler drill rig is widely used in water well drilling, rock drilling operations, photovoltaic base station construction, wind power hydropower station foundation operations, etc. The crawler water well drilling rig is a machine designed by combining the characteristics of water drills and air drills.

What is a pneumatic crawler drill rig?

The daily drilling efficiency reaches 100-400 meters, and the operation is simple, requiring only 3-5 people to start work. The pneumatic crawler drill rig is widely used in water well drilling, rock drilling operations, photovoltaic base station construction, wind power hydropower station foundation operations, etc.

Do you need a crawler for a drilling rig?

You will need to choose a crawler if it needs to move at a low speed over unlevel areas or on very loose ground. The stability of the drilling rig depends on the surface area of the tracks. As such, the wider the tracks, the more stable the drilling rig will be.

What equipment does YG provide for a crawler drilling machine?

YG also provides crawler drilling machine accessories, such as air compressors, drill pipes, drill bits, etc. The air compressor provides compressed air for the crawler drilling machine. The operating system of the drilling rig is mostly controlled by pneumatics, and the air relay is controlled by the on-off of the air circuit.

What is a crawler drill?

Our crawler drills are engineered to provide unmatched versatility, enabling efficient performance across various drilling applications, including anchoring, micro-piling, and jet grouting. Equipped with modular systems and adaptable configurations, these machines can be tailored to meet specific project requirements.
