

Descent device drill rig

What is a Miller manual descent device?

The Miller Manual Descent Device is designed for a variety of applications where smooth, controlled descent from an elevated position is required. [Learn more.](#)

What is a controlled descent device?

Controlled Descent Devices are used for vertical or sloped emergency descent applications when quick extraction from a dangerous situation is vital. When an emergency requires a cost-effective mode to retrieve workers from high places, controlled descent devices are simple, fast, and safe solutions.

How do I connect an emergency descent device?

If using a sloped descent model, connect the emergency descent device with the guide cable sleeve or braking trolley and suspension bars to a user supplied and installed guide cable. All fields are required unless indicated optional. What can 3M help you with? What personal safety equipment are you interested in?

How does a descent rope work?

The device: controlled by the user: allows for making descent fast or slow: decelerating and stopping by applying slight outward pressure on the free end of the line: and locking in a stationary position for a hands-free work environment. Must be ordered with Miller brand descent rope. [Let's Connect!](#)

How does rigscape work?

Thanks to patented magnetic braking technology, the speed of the descent is controlled automatically. This means even injured or incapacitated workers can safely descend from the derrick using Rigscape or they can be lowered to the ground on a stretcher attached to the device. RIDE begins to descend when it is activated by the weight of the worker.

How does a rig rig work?

The device consists of a line, which is attached to the derrick or mast and anchored to the ground at an angle, as well as an escape trolley with a hand brake that workers use to escape the rig and descend to the ground at a speed dependent upon manual brake control.

All FallTech® Rescue and Descent kits include our unrivaled UniDrive device that not only provides self and assisted rescue and descent capabilities, but can also be used for lifting ...

Geronimo is carefully engineered and constructed of the finest materials. It provides the quickest and safest method of controlled descent from a derrick ...

Devices that enable a user to make a vertical or sloped descent from height at a safe speed. Controlled descent devices can aid in work positioning or in the ...

Descent device drill rig

Diversified Fall Protection offers a complete OSHA compliant controlled descent device line, including vertical and sloped descent models for complete versatility and flexibility for any job ...

Rigscape emergency evacuation device features automatic braking & a weight activated release system. It's easy to install & can be re-used many times

Body harness, specific to oil and gas Emergency descent devices Trauma relief straps for fall arrests When working out in the elements at an oil and gas site, ...
