

Diy cable tool drilling rig

How does a cable drilling rig work?

It is a very old technique, slow but steady and only requires one person to operate the rig. A derrick is raised to support the cable tool. The cable tool is a drilling "bit" that is repeatedly raised and dropped in the hole to break up any formation encountered. Then the cable tool is swapped out and a bailer is lowered into the hole.

What is cable tool drilling?

Cable tool drilling, also known as percussion drilling, is a method that uses a heavy drill bit suspended by a cable. The drill bit is raised and then dropped into the borehole to break up rock and soil. The broken material is removed using a bailer or sand pump. This technique is commonly used in: How Does Cable Tool Drilling Work?

How do you drill a hole in a drill rig?

The method I would recommend is the cable tool method. You could buy used tools reasonably priced. All the rig has to do is spool cable (5/8" or so) to allow the bit to go up and down. A walking beam is needed to drill with. This is what gives the up/down movement that does the chewing up of the material your going through.

What is a cable drill?

This technique is used by some commercial drillers. It is a very old technique, slow but steady and only requires one person to operate the rig. A derrick is raised to support the cable tool. The cable tool is a drilling "bit" that is repeatedly raised and dropped in the hole to break up any formation encountered.

What rig do you use to drill a water well?

My Father and Grandfather used to drill water wells with a "Baptist" type rig. It was slow compared to a rotary but very simple and cheap to make. They could probably go down to four hundred feet or so. It doesn't require large horse power or a water pump to circulate.

How do you drill a rig with a walking beam?

(Riverview) Egon has the right idea. The method he is talking about is called balling in some circles. The method I would recommend is the cable tool method. You could buy used tools reasonably priced. All the rig has to do is spool cable (5/8" or so) to allow the bit to go up and down. A walking beam is needed to drill with.
