

Do it yourself cable tool well drill rig

What is cable tool drilling?

Cable tool drilling, also known as percussion drilling, is a method that uses a heavy drill bit suspended by a cable. The drill bit is raised and then dropped into the borehole to break up rock and soil. The broken material is removed using a bailer or sand pump. This technique is commonly used in: [How Does Cable Tool Drilling Work?](#)

How does a cable drilling rig work?

It is a very old technique, slow but steady and only requires one person to operate the rig. A derrick is raised to support the cable tool. The cable tool is a drilling "bit" that is repeatedly raised and dropped in the hole to break up any formation encountered. Then the cable tool is swapped out and a bailer is lowered into the hole.

What is a cable drill?

This technique is used by some commercial drillers. It is a very old technique, slow but steady and only requires one person to operate the rig. A derrick is raised to support the cable tool. The cable tool is a drilling "bit" that is repeatedly raised and dropped in the hole to break up any formation encountered.

Do you need a DIY well drilling kit?

You no longer have to rely on municipal water systems or worry about droughts and water restrictions. With a DIY well drilling kit, you can tap into groundwater reserves on your property and have access to clean, fresh water at all times.

How does a water drill rig work?

Water drill rigs use a combination of high volume varied pressure air, water and drilling mud to expel cuttings, unless you want to withdraw the drill at regular intervals not much else will function and will wedge drill head in bore hole in short order. Cable tool rigs do not use a medium to flush the well. They bail out the cuttings as required.

Can you drill a well on your own land?

The idea of being able to drill a well on my own land without hiring expensive professionals seemed too good to be true. But as I delved deeper into the world of DIY well drilling, I discovered that with the right tools and knowledge, it is indeed possible.

Today I will be attempting to drill my own well, with my homemade drill rig! This project was massive, and definitely took some time to figure it out, so sorry for the delay in the upload!

Often when drilling in more solid rock formations, a cable tool rig may be more efficient in finding small fissures of water than a rotary air machine as the rotary air drill seals off such fissures with high air pressure.
