Diverter system In Drilling oil and gas Rig is a major equipment in well control. Here, we introduce its applications, procedure & diagrams.

The G-FORCE Coiled Tubing Jar is fully adjustable down-hole by varying the pull of the coiled tubing to fire up or slacken off to fire down. Cocking or resetting the Coiled Tubing Jar is ...

A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the bottom of a drill string. The fast hammer action breaks hard rock into small cuttings and dust that are evacuated by a fluid (air, water or drilling mud). The DTH hammer is one of the fastest ways to drill hard rock. The system is thought to have been invented independently by Stenuic...

The differences between the air rotary system and this drilling system are primarily the cutting action and the resulting cuttings, as shown. The down- the-hole hammer uses the rotary ...

Most customers prefer when running a tong with a backup, the (series) door interlock that only shuts down the tong motor (tong rotary gear from turning) allowing other hydraulic functions to ...

The MR-5 ID is a hydraulic drilling unit for using 2" or 3" down-the-hole hammer, or rock drill weighing 58 kg with separate right and left rotation, provided with ...

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and

to transition from dirt boring to rock ...

The down hole advancement of the tool and casing the bore hole or maintaining circulation when mud drilling is the task at hand and this is the one skill that makes us quite ...

Down-the-Hole (DTH) drilling is a technique used to create deep, precise holes in hard rock and challenging ground conditions. In this method, ...

In the world of drilling machinery, hydraulic drilling rig machines and down the hole (DTH) drilling machines are two popular choices, each serving different needs based on their ...

The hydraulic operation upwards allows the customer to utilize pipe stretch to assist in the jarring performance, and use the drill collar mass to assist in the jar impact. The jar can be pulled ...

Pneumatically driven DTH hammers are widely spread and known in the industry, however a hydraulic driven DTH hammer drill is still a challenge. The DTH ...

The standard is a Lever Push drilling specification. Two specifications of drill control lever are available for the machine. Basically the drill control lever in the text uses a Lever Push drilling ...

As the name suggests, the down-the-hole drilling rig has a relatively shallow drilling depth, no hydraulic lifting device, and the hoist is used for lifting and lowering the drilling tools.

The system uses a dual electro-hydraulic proportional load-sensitive variable pump to provide a power source for the drilling rig propulsion and rotation system.

When rock drilling, the impactor dives into the hole, and the piston (hammer) in the impactor reciprocates to strike the shank through the gas ...

CENTER ROCK manufactures a full line of air rock drilling tools and accessories including our Down-the-Hole (DTH) hammers and bits from 3.5" - 48" (89 ...

When using a down the hole drill, the hammer is located behind the bit inside the hammer drill. Compressed air is forced down through the hammer, it strikes ...

The Security Custom Hole Openers are designed to handle big-hole drilling projects, offshore well conductor holes, and other drilling needs where speed and reliability are important
