Where are drilling machines made?

In Scandinavia, we can boast in having over 80% market share, and no matter which continent you may be visiting, with our strong brands, you will always come across Drilling Machines originating from our small town of Rosenfors - MADE IN SWEDEN ! Since the start, Machinery Scandinavia, has produced more than 700 000 drilling machines.

What is a drilling rig?

Click request price for more information. Drilling rigs are specialized machines used to create holes in the ground for various purposes, including oil and gas extraction, water well drilling, and geological exploration. These rigs can range from small, portable units to large, complex structures that require significant setup and manpower.

What is a radial drilling machine?

Radial drilling machines are used for drilling large holes in heavy materials. They have a horizontal arm that extends from the pillar, allowing the head to be adjusted laterally and the drill head to move up and down along the pillar. Radial drilling machines are typically large and powerful and are used for drilling in metal, wood, and stone.

What is a pillar drilling machine?

Pillar drilling machines are the most common type of drilling machine and are used for general purposes. They have an upright pillar that supports the head and the drill, making them stable and precise. Pillar drilling machines are suitable for drilling holes in wood, metal, and plastic.
