

Drill rig operator motor vehicle operator army corps of engineers

Who should operate drilling equipment?

18.H.02 Drilling equipment shall be operated only by qualified (training, evaluation and experience) personnel who are designated by their respective employer to operate subject equipment. The drilling equipment shall be operated, inspected, and maintained as specified in the manufacturer's operating manual.

What are the responsibilities of a drilling operator?

The operator shall verbally alert employees and visually ensure employees are clear from dangerous parts of equipment before starting or engaging equipment. The discharge of drilling fluids shall be channeled away from the work area to prevent the ponding of water.

What certifications do you need to operate a rigging machine?

The machine/equipment must be equipped with a load chart. Contractor must provide certification that the operator is trained, qualified and designated for the operation of the machine (multi-purpose, material handling and construction equipment) being utilized to lift loads suspended by rigging equipment. 18.G.30 Floating Equipment.

Who conducts equipment operator training & evaluation?

All operator training and evaluation shall be conducted by persons who have the knowledge, training, and experience to train the equipment operators and evaluate their competence. These examiners may not license themselves, but instead, must be licensed by another qualified examiner.

Do you need a high visibility vest for a drill rig?

High visibility vests used on drilling rigs, if required, must be of the break-away type. Auger guides shall be used on hard surfaces. If infeasible due to type of drill rig being used, a risk assessment shall be performed by a CP, and documented in the AHA as to why this requirement is not feasible.
