

Drill rig sandvik

Sandvik DD311 is available in three different versions, including DD311D and DD311DE. It is a medium size, single-boom jumbo designed for fast and ...

SANDVIK D55SP The D55SP comes with low-pressure air for rotary drilling or high-pressure air for down-the-hole (DTH) drilling. The drill excels in single pass drilling, where productivity ...

Sandvik DU311 is a center-articulated, carrier-mounted in-the-hole (ITH) drill rig designed for high mobility and utility in underground mining. This compact machine was developed with an on ...

Sandvik Sandvik is renowned for its surface drill rigs, particularly the DX700 and DX800 models, which are equipped with hydraulic top hammer rigs. These rigs are primarily ...

Sandvik DD422iE performs precise, repeatable drilling procedures that can significantly reduce the amount of waste material produced, making your mining and development process more ...

The Sandvik DE881 is a heavy-duty multipurpose exploration drill rig and is the industry benchmark in performance. The DE881 offers more depth capacity in both diamond and ...

The Sandvik Leopard DI650i is a down-the-hole drilling rig, diesel-powered and self-contained, designed for high-capacity drilling applications in surface mining.

We engineer an extensive range of underground drill rigs for mining development and production. Available in a variety of feed lengths, boom configurations and size classes, our underground ...

Typical applications for DX900i are road cutting, pipe-line drilling and foundation drilling, as well as production drilling in medium size quarries. Therefore DX900i is most often used by ...

Sandvik has received its largest ever order for surface drill rigs, valued at SEK 248 million. The order from U.S.-based Sandvik dealer Country Boy Supply, LLC was booked in ...

Sandvik technical training courses are mainly designed as drill rig model specific. The target being that the attendee is able to independently troubleshoot and service drill rigs.

Sandvik intelligent surface drill rigs bring the latest technology to surface mining applications. View our leading range of surface drilling rigs.

Sandvik DL421 is a versatile longhole drill rig engineered for large-scale production drilling in underground

Drill rig sandvik

mines. It is designed for vertical and ...

These calculations are based on feedback from field operatives and can be reasonably expected with vertical, water filled holes, by a well-trained drill-ing crew using high quality drilling tools. ...

Sandvik drill rigs feature a durable and long-lasting construction reinforced with high-performance materials. These machines offer ideal solutions for industrial ...

Intelligent longhole drilling with the Sandvik DL432i rig - a cutting-edge drill delivering precision and advanced technology for underground mining.

Visit Sandvik Alpha® 360 product page Sandvik Alpha(TM) 360 is an addition to the unique Sandvik Alpha(TM) system. Its robust design offers double the lifespan compared to industry standard ...

Explore the precision and efficiency of the Sandvik DD422iE electric drill rig, a top-notch solution for development drill rigs in mining operations.

Optimize hard rock mining with the Sandvik DL321 rig - a longhole drill meticulously designed for reliability and efficiency underground.

Traxxon is a leading supplier of surface drill rigs from Sandvik in Canada, providing precision rock drilling equipment for challenging applications.

Sandvik DD312i is an advanced single boom development drill for underground mine development and small scale tunneling. It features a compact carrier and ...

Ranger(TM) DX800 is a hydraulic, diesel-powered, self-propelled top hammer drill rig with an ergonomic cabin and rod handling system. Typical applications are ...

Our Sandvik DR540 high-pressure down-the-hole (DTH) drill delivers leading penetration with an up to 34.5 bar (500 psi) compressor. The large air ...

Top hammer drilling tools Sandvik's complete range of Top Hammer drilling tools is designed to transmit intensive impact power into the rock, while at the same time reducing loss of energy.
