What is rock commander automated sampling & surveying drill rig (rcass)?

Rock Commander Automated Sampling and Surveying Drill Rig Ausdrill latest custom-built Rock Commander Automated Sampling and Surveying Drill Rig (RCASS) is an innovation in automated precision drilling and an industry first in labour free sampling! Download the RCASS flyer below.

What is a rock commander rig?

It's a rig that's built to handle the toughest ground conditions and keep performing shift after shift. At Ausdrill, we don't just operate the Rock Commander. We design, build, maintain, and refine these rigs ourselves. That means every drill pad benefits from our decades of in-house expertise and our ongoing commitment to innovation.

What is a drill rig?

A drill rig is a machine designed for drilling in grade control environments. The Ausdrill Rock Commander, in particular, is equipped with the RayTrac RFID sampling system for human supervision, which saves time, labor, and onsite costs typically associated with sample collection on a drill rig. The Rock Commander also

Which Ausdrill rig is right for You?
