

Drilling rig bits for sale

What drill bits are available at MSC Industrial Supply?

Precision in drilling is essential, which is why at MSC Industrial Supply, we offer a wide range of drill bits and accessories to maximize your holemaking efforts. Our selection includes jobber drill bits, core drills, circuit board drill bits, and drill bushings, ensuring you have the best drill bits for metal, wood, or any material you work with.

What kind of drill bits do I Need?

Circuit board drill bits or jobber bits are excellent choices for their precision and sharpness. It's crucial to drill at the correct speed to avoid overheating and to use a backing material to support the composite during drilling. Ceramics and glass require extremely rigid bits like diamond-tipped or carbide-tipped masonry bits.

What types of drill bit sets are available?

For a complete and versatile solution, we offer drill bit sets that cover a wide range of applications, including metal drill bit sets and wood drill bit sets. No matter what your drilling needs may entail, our selection of individual drill bits and complete drill bit sets are designed to cater to any project at hand.

What is the most common job for drill bits?

Drilling holes is the most common job for drill bits, applicable to all materials. We will go into more detail on materials below, but just as a quick overview, here's a list of materials and their related drill bits.

Do you need a specialized drill bit set?

To drill the most precise holes in wood, metal, masonry, plastic, or composite, you need a specialized drill bit set that can handle each material's unique challenges. Specialized drill bits are also required for tasks beyond hole-making, such as countersinking, tapping threads, and extracting broken fasteners.

Are drag bits still used in oil & gas drilling?

Nothing could be further from the truth. Drag bits and tricones still have their place in oil and gas drilling, water well drilling, construction, and more. That's why we've included them in the lineup as well. And we've not forgotten the completion and workover market either.
