

Drilling rig day rates

What is a drilling rig day rate?

It represents the daily cost incurred by an operator for renting a drilling rig from a contractor. This rate encompasses various expenses associated with the rig, including personnel, equipment, and operational costs, over the duration of a contract. The day rate comprises all-inclusive costs involved in running a drilling operation.

What is a day rate in oil drilling?

The day rate in oil drilling refers to the total daily cost of renting a drilling rig, including personnel and incidentals. It's calculated by dividing the total contract value by the number of days in the contract. Day rates are a key metric for investors, indicating industry health and correlating with oil prices and rig utilization rates.

Who pays a day rate for a drilling project?

The operator of a drilling project pays a day rate to the drilling contractor who provides the rig, the drilling personnel and other incidentals. The oil companies and the drilling contractors usually agree on a flat fee per contract, so the day rate is determined by dividing the total value of the contract by the number of days in the contract.

How much does a rig cost per day?

Lower specification rigs in some North African countries have been listed for as little as \$8,000 per day, while super-spec rigs in one Gulf Cooperation Council (GCC) country reportedly reached up to \$56,000 per day. Day rates across Latin America (LATAM) also have a significant range, with lows of \$10,000 per day and highs of \$48,000 per day.
