

Drilling rig fire 2019

What caused the Oklahoma rig fire and blowout?

The CSB's report determined that the failure of two preventive barriers was the cause of the blowout and rig fire in Oklahoma. The report calls on regulators, industry groups, the state of Oklahoma, and companies to address such gaps.

How many workers died in the rig blowout?

At the time of the blowout, five workers were killed. Three were in the driller's cabin, and two on the rig floor ran inside during the blowout and fire.

How did a blowout mud & gas rig cause a fire?

"When the blowout mud and gas ignited, it created a massive fire on the rig floor. All five of the workers inside the driller's cabin were effectively trapped because fire blocked the driller's cabin's two exit doors," said Lauren Grim, a CSB investigator who noted there is no guidance to ensure that an emergency evacuation option is present.

Did a man die from an oil rig explosion & fire?

November 14, 2017 - A man was seriously hurt in an oil rig explosion & fire in White County, and later died from his injuries. In September, 1941, a nine-hour conflagration at the Whiting Standard of Indiana refinery killed one man and injured 20 others.

What regulations are missing for onshore oil and gas well drilling?

The investigation revealed that there are no regulations specifically developed for onshore oil and gas well drilling. Our investigation found that both of those barriers failed, with several factors contributing to the loss of barriers including a lack of planning, training, equipment, skills and procedures.

Did underbalanced drilling and tripping cause a large amount of gas?

The report explains that unplanned underbalanced drilling and tripping operations allowed a large quantity of gas to enter the well.

Federal safety regulators, state oil and gas authorities, and the energy industry need to close regulatory gaps that contributed to the worst oil ...

The U.S. Chemical Safety and Hazard Investigation Board or CSB, presented the final report on the deadly rig explosion near Quinton last year that killed five workers.

On April 20, 2010, an explosion and fire on the offshore drilling rig Deepwater Horizon killed 11 men and injured 17 other crew members. Over ...
