

Drilling rig kpi

What is a drilling KPI?

This KPI measures the average cost incurred per meter drilled, combining expenses from equipment efficiency, labor, and materials. It is a key financial metric for your drilling operations, helping you assess bidding strategies and overall project profitability.

How can a drilling business benefit from a core KPI?

Empower your drilling operations by tracking core KPIs that illuminate every cost and efficiency metric. You'll gain real-time insights into financial metrics and operational efficiency, transforming raw data into powerful business decision-making tools.

Why should you use key performance indicators (KPIs) during drilling?

We support our clients in identifying areas of improvement, so they can make decisions quickly and optimize the performance of their operations, through a solution that systematically measures and interprets Key Performance Indicators (KPIs) during drilling.

How can KPIs improve drilling operations?

Empowering your drilling operations begins with using the right KPIs to drive better decision-making. Precision Bore Solutions demonstrates how tailored drilling KPIs can boost operational efficiency and improve contract negotiations. Leveraging data-driven insights helps fine-tune pricing strategies and optimize staff training.

Why is tracking drilling operations KPIs important?

For a drilling business like Precision Drill Solutions, tracking drilling operations KPIs is essential for achieving consistent precision and operational efficiency. One of the most critical metrics is the drilling accuracy rate, which helps in measuring precision in operations.

What are drilled KPIs?

Drilling KPIs reveal up to 15% improvements in operational efficiency. Identifies cost per meter drilled variations to optimize resource allocation. Supports safety incidents tracking and enhances project turnaround. Boosts investor confidence with clear financial metrics and profitability analysis.

Empower your drilling operations by integrating key performance indicators to drive operational efficiency and profitability analysis. Precision ...

The drilling teams found it difficult to relate individual well performance to the high level KPI target and were unable to properly strategize to improve performance. A new ...

Key performance indicators play an important role in drilling operations since they facilitate the evaluation of

Drilling rig kpi

their performance between wells with similar characteristics. Using ...

Is your drilling business tracking its drilling KPIs effectively? Explore how essential metrics--such as drilling company metrics and ...

KPI - Improving Drilling Performance through Analytics Trax rig state KPI's are derived from detailed drilling data (Hz) using AI-enabled algorithms to gather statistics on the duration of the ...

Key performance indicators play an important role in drilling operations since they facilitate the evaluation of their performance between ...

Achieved the best ever cost/meter, through very efficient operation with an improvement of 4% time to drill a meter and lowest NPT record of 8.5%. Multiple visualization ...

Rig management needs to understand key aspects of rig performance - drilling KPIs, downtime, utilization, and personnel. Go beyond IADC DDR Plus as RIMDrill transforms raw rig-sourced ...

Set and track KPIs for individual rig workers, such as drilling efficiency, safety compliance, and equipment maintenance. Visualize performance data to identify areas for improvement and ...

An increased number of drilling KPI (Key Performance Indicators) are being used to assess the drilling performance often with short time intervals. The recent advantages in measuring, ...

In fact, two or three KPIs are needed: one to address reliability, one to address efficiency, and if a tool that provides data is being evaluated, there must also be a KPI to ...

Abstract OEE (Overall Equipment Effectiveness) is a key performance indicator (KPI) widely used in performance analysis in the mining industry. The present study develops the ODE indicator ...

Drillex Innovators leverages Petroleum Exploration KPIs for robust operational efficiency and cost control. With state-of-the-art drilling technology and comprehensive data ...

Our Metrics App completely automates the collection of well, bottom hole assembly, hole section, and rig KPIs. For new clients, Corva will backfill historical performance ...

Why Do Borehole Drilling Businesses Need to Track KPIs? Empower your drilling operations by tracking key performance indicators that ...

Tracking KPIs like rig utilization and non-productive time provides real-time insights that are critical for operational efficiency. Monitoring financial metrics such as EBITDA margin ...

Drilling rig kpi

Discover how to leverage key metrics to expand your drilling business. Learn which indicators matter most for increasing profitability and ...

Tracking key drilling metrics provides real-time insights into operational efficiency and financial health. Monitoring cost-related KPIs, such ...

For a quick overview, here are the top five KPIs from Top 25 Oil and Gas KPIs - 2025 Edition report: % Drilling rig utilization rate - Tracks the percentage of time an operational drilling rig is ...

OEE (Overall Equipment Effectiveness) is a key performance indicator (KPI) widely used in performance analysis in the mining industry. The present study develops the ODE ...

Stay ahead in the oil and gas business - track the oil and gas industry KPIs for operational success. Optimize your oil and gas operations ...

AIDE is a sophisticated drilling domain Large Language Model (LLM) that seamlessly integrates with your company's existing data infrastructure. By ...

Standard performance evaluation is based on macro kpi (drilling ROP, flat time duration,..), instead higher the accuracy of the time analysis, higher could be the potential for ...

Why Do Precision Drilling Solutions Need to Track KPIs? Empower your drilling operations with real-time insights into project timelines and cost overruns so you can make ...

Discover the top 7 KPIs metrics for Borehole Drilling businesses. Maximize performance and growth with our expert insights! Click to learn more.

Analysis and reporting of offset well KPIs, including different graphs by operations analyzed, opportunities for improvement, and identification of NPTs and how ...

How Can Operational KPIs Improve Petroleum Exploration Efficiency? Empower your Exxon-level operations with robust Petroleum Exploration KPIs that drive efficiency and ...

We can quantify drilling factors and develop a basis of design to reduce risk as low as reasonably practicable (ALARP). Using real-time rig activity monitoring, we measure performance to ...
