

Drilling rig power transformer

Can drilling rigs be electrified?

As more and more markets' electric grids develop, so does the potential to electrify rigs, increasing opportunities to meet and exceed operational sustainability goals. Onshore drilling rigs need consistent, reliable power to operate efficiently, but they no longer must rely on diesel generators.

Do Drilling Contractors use power from the utility grid?

Drilling contractors have used electrical power from the utility grid for decades--most often in densely populated metropolitan areas and similarly sensitive locations, where noise ordinance restrictions precluded the use of onsite diesel engines.

How does a PowerTAP power transformer work?

The PowerTAP power transformer module receives highline power through a medium voltage, reel-fed cable next to a utility pole. Rig move operations may require a switch to generator power, to account for timing or utility company service activation or deactivation.

How much power does an AC drilling rig need?

AC drilling rigs rely on four CAT 3512C generators (with a total of 4 MW of electrical capacity), to power the 2,000-hp drawworks, three 1,600-hp mud pumps and other power demands. With the PowerTAP capable of providing electrical capacity equal to 4MW from the grid, the system can support the rig's high-power requirements.

What are HPS land drilling Transformers?

HPS land drilling transformers have been specifically designed and built for the land drilling market. These innovative designs provide ideal solutions for the drilling environment, where quality, ease of installation, portability, environmental concerns and durability are key.

What is a dry-type land drilling transformer?

HPS dry-type land drilling transformers feature the industry's best technology and manufacturing processes. They feature designs that are built to withstand the vibration and shock associated not only with the difficult day-to-day drilling conditions, but also the transportation between job sites. Heavy-duty core & coil and frame construction
