

Drilling rig recertification

How can Allrig support my drilling equipment's health?

Please visit the Drilling Equipment section of the website for details on what Allrig offer to support your Drilling Equipment's health. To minimize interruptions in your operations, Allrig offers the very best in specialized equipment repair, overhaul, upgrade and recertification.

Does drilling equipment need to be refurbished?

Equipment used in drilling operations must work all the time, every time. Documentation requirements are increasing the burden on equipment owners. Until recently, the industry did not have a consistent method of providing guidance on equipment refurbishment.

What is rig refurbishment & upgrades?

Rig Refurbishment & Upgrades - Full-scale refurbishment services including structural reinforcements, mechanical/electrical system overhauls, and rig recertification in accordance with OEM and classification society requirements (ABS, DNV, Lloyd's Register).

What is a recertification process?

Initially intended for use in Norway and the US, the generic processes may be adapted to other legislations and equipment. The purpose of recertification is to verify and document that the equipment's condition and properties are within specified acceptance criteria and requirements stipulated in recognized codes and standards.

What does a rig expert do?

Our Expertise Includes: Rig Selection and Evaluation - Technical assessment and suitability analysis based on operational requirements and regulatory standards. Rig Pre-Hire Inspection - Comprehensive audits covering structural integrity, BOP systems, well control equipment, and mechanical/electrical systems to ensure readiness.

Can a rig be tested independently?

Alternatively, independent load testing of all primary load path components may be conducted as long as such testing satisfies all intents and purposes of the independent testing of the system and its attachments points on the rig as described in C.10.1.

With unmatched technical and global experience, RigQuip offers rig packages, maintenance and drilling equipment parts to customers worldwide.

MT, PT, UT Recertification of Iron: Up to 30,000psi BOP's, Flow Iron - All Sizes Valve, Safety Valve, Hydraulic Valve, Manual Valve Drill Collars, Subs & Fishing Tools Inspection on ...

Drilling rig recertification

DNV saw this challenge and implemented a recommended practices (DNV-RP-E101) which describe in detail how to assess, refurbish, test, and recertify drilling equipment. Initially ...
