

Drilling rigs in downtown los angeles

What are Los Angeles' hidden oil rigs?

In conclusion, Los Angeles's hidden oil wells offer a fascinating glimpse into the city's oil-rich history and modern urban landscape. These concealed rigs, whether integrated into office buildings, shopping malls, or community landmarks, showcase the city's ongoing relationship with its oil past.

Are there oil rigs in Los Angeles?

While Los Angeles doesn't look like the oil giant it once was, there are still a number of active drill sites all over the city. These oil rigs are hidden in plain view on high school campuses, attached to shopping malls, and located inside buildings that otherwise look like regular office buildings.

Does Los Angeles have oil drilling?

Unless you are an Angeleno, you may not associate oil drilling and petroleum extraction with the Golden State. In truth, Los Angeles is ground zero for urban drilling. Oil companies drill wells and use toxic industrial chemicals on well sites just feet away from homes, schools, and medical facilities.

Is Los Angeles' long history with urban drilling over?

But now, after nearly a decade of community organizing and studies demonstrating the adverse health impacts on people living nearby, Los Angeles' long history with urban drilling is nearing an end.

Are there any drill sites in Los Angeles?

Eventually, the site was sold in 1998 to Breitburn Energy and still operates approximately 40 active wells to this day. Located on 5733 W. Pico Blvd in Los Angeles, California, lies another drill site that operates inconspicuously within the city. The Packard Drill Site was built in 1968, two years after the Cardiff Tower drill site.

Is Los Angeles a ground zero for urban drilling?

In truth, Los Angeles is ground zero for urban drilling. Oil companies drill wells and use toxic industrial chemicals on well sites just feet away from homes, schools, and medical facilities. These urban drilling sites degrade air quality and expose communities to toxic and carcinogenic emissions.
