

# Drilling rigs in the gulf of mexico map

How many oil rigs are in the Gulf of Mexico?

In the Gulf of Mexico, oil rigs go beyond the edge of the continental shelf, 100 miles offshore, to around 350 miles from the Gulf shores. Let's explore the 10 Major Oil Rigs in the Gulf of Mexico. Petronius is one of the biggest oil platforms in the Gulf of Mexico, operated by Chevron, 210 km southeast of New Orleans, US.

When did oil rigs start in the Gulf of Mexico?

Oil platforms in the Gulf of Mexico began appearing in the 1940s and became more elaborate, complex, advanced and multi-purpose structures with the passage of time. The initial oil rigs were small and were used to extract oil from the nearshore wells. In the 1970s, bigger platforms were being constructed in deeper waters.

How many abandoned oil rigs are in the Gulf of Mexico?

The Gulf of Mexico is home to over 4,000 abandoned oil rigs. The majority of these oil rigs were abandoned between the late 1970s and early 1990s when oil prices plummeted below \$10 per barrel and the offshore drilling industry went into decline. Many of these rigs were simply abandoned, leaving them to rust and fall apart.

Why do oil companies drill in the Gulf of Mexico?

Use this map of offshore oil drilling in the Gulf of Mexico to understand and communicate the challenges and risks associated with accessing fossil fuels. Oceanography also contributes to the study of pollution. The geologic and chemical properties of the Gulf of Mexico helped oil companies choose the safest and most lucrative places to drill.

How many oil platforms are there in the Gulf of Mexico?

The first platforms were tiny and were used to extract oil from near-shore wells. As time went on, the size and complexity of the platforms increased. In the 1970s, the first platforms were built in deep water, and since then they have become increasingly large and complex. Today, there are over 4,000 oil platforms in the Gulf of Mexico.

How much oil is in the Gulf of Mexico?

The Gulf of Mexico reserves are estimated to contain 3.44 billion barrels of oil and 5.7 trillion cubic feet of natural gas that can be procured from the 459 active oil and gas fields in the region. The Gulf of Mexico offshore oil production is 15% of the total crude oil production of the United States.
