

Drilling rigs need walking system

While walking drilling rigs are helping to improve challenging oil patch economics, it also appears the decision whether to use newer or more ...

From the harsh desert landscapes to the cold arctic tundra and everywhere in between, we can provide a rig walking or moving system solution for your ...

In this way, Entro Pin-On walkers can be designed to fit virtually any land drilling rig substructure. They are primarily suited to moving a substructure with umbilical connections back to the rig ...

Striker's experience stems from drilling rig design and operation, and as such we understand the next layer of solutions that comes with walking system integration. One of which is keeping ...

The Bigfoot Rig Walking System is a patented, scalable-capacity drilling rig and substructure moving system. The Bigfoot's intelligent design incorporates the ...

While there are different types of drilling rigs, these rigs obviously share many similarities since the tasks that they perform are identical. In particular, all ...

At Columbia Industries, we're experts in walking Drilling Rig Systems and our Kodiak Cub Walking System can move drilling rig substructures.

Move Your Rig As-Is Entro StrongBack walkers are specialized Pony-Sub Walkers designed to be used with single piece substructures with above ground completions. The StrongBack allows ...

The lift and slide system is operated by hydraulic cylinders to move the rig - including drill floor equipment and full setback -to the desired position step by ...

The Littlefoot Rig Custom Walking System is a scalable-capacity drilling substructure and backyard moving system. The Littlefoot's innovative design ...

Equipment and Permits Drilling an unconventional well is the same as drilling a conventional one. Both use the same equipment and require identical environmental permits, which are ...

The Rig Roamer (TM) walking system technology is suitable for a rig centerpiece or for an entire drilling platform. With low pressure hydraulics it is designed for ...

PONY-SUB WALKERS Designed to efficiently mobilize land-based, box-on-box drilling rigs for

Drilling rigs need walking system

hole-to-hole moves. The Entro system fits large walking feet into existing sub designs and still ...

Make Your Rig Move Faster The X-Swing is our most capable walking foot yet. Due to its extended travel stroke and expanded flexibility, it boasts double the walking speed and, as a ...

The latest innovation in drilling rig moving systems, we designed our Sprinter Walking System to provide our customers with a safe, efficient, and easy to ...

The walking machinery is the heart of the system and includes all of the moving parts, from the jack down to the foot. Different types of walking machinery are suited to different applications, ...

Competitor rigs typically cannot skid more than 100 feet away from mud tanks without losing sufficient pressure in flow lines. PACE ® -X800 rigs feature: Omni-directional walking system ...

Bentec's Rig Walking System provides a solution for reducing rig-moving times on multi-well applications. The move of the complete rig to the next well thus ...

The beauty of walking rigs is that the rig will be dedicated to drilling multiple surface holes, intermediate sections and horizontal sections before drilling fluids must be changed.

The rig is also equipped with components required to drill extended-reach horizontal wells, such as 7,500-psi mud pumps, a walking system, bifuel engines, a 500-ton top drive, ...

Quicksilver(TM) rigs could not bid these contracts as, the rig's 18"-0" working clearance was too short for what was required. Drilling multiple wells on a single site, or "pad ...

With a capacity of moving loads of up to 12 million pounds, our walking system solutions are custom designed and fabricated to meet our customers" ...
