

Electric air compressor home use recommendation

What are the best air compressors for different types of use?

The list we prepared today gives you the line on the best air compressors for different types of use and covers the needs of most people. If you need a portable and quiet model to use inside your home garage without making a fuss and annoying everyone in the house, get your hands on the Makita Mac320Q.

How is a compressor rated?

Compressors are rated by the volume of air delivered at 90 psi. This number is expressed in cubic feet per minute (cfm) or standard cubic feet per minute (scfm). Compact compressors move less air than much larger units, typically producing between 1.0 and 2.8 cfm. That's still plenty of power to run most air tools.

How do I choose the best air compressor?

The key to choosing the best air compressor is to match the unit to the job demands. Portable compressors are ideal for the home and the job site. Stationary compressors provide the high volume of air needed for powering automotive and production air tools.

How do I choose the best air compressor for my garage?

Choosing the best air compressor for your garage means navigating models with various CFM, cycle rate, airflow, and form factors. Even in a home garage, you may want a portable stack, pancake-style, or a traditional standing tank. Fair warning -- I lean towards standing tanks!

How much air pressure does an electric compressor need?

For consideration, each electric compressor needed to have an oil-free pump and produce between 90 and 165 psi of air pressure, because most air tools require 40 to 90 psi. We also looked for a range of storage tank sizes to suit different tools and projects.

How many rated air compressors are there?

We started by researching more than 35 highly rated air compressors, looking for top models in several home use categories. To narrow down the number for testing, we first considered the brand. Manufacturers such as California Air Tools and Bostitch are well respected in the air compressor industry.
