

Eve online moon drilling stability rig

How do Moon drilling rigs work?

Moon Drilling Efficiency - these rigs effect the volume of the moon chunk that is pulled from the moon, in relation to the amount of time set for the extraction. Moon Ore Stability -these rigs effect the radius of the asteroid belt created when the moon chunk is exploded, making them easier and faster to mine.

Can the moon mining drill service module be fitted in a refinery?

However,the Moon Mining Drill Service Module cannot be fittedin a Refinery that is not in a valid Moon Mining location. When the designs for Refineries were first being fleshed out,we knew that tying a single structure to a single moon would amplify some of the combat issues that face other Upwell Structures.

Can upwell reprocessing rigs be anchored on a moon?

There's a general restriction for all Upwell Structures within 4000km of any moon. The only exception to this is Refineries which can be anchored at the Moon Mining beacons. what will happen to bpos for m-set and l-set reprocessing rigs?

What rigs affect the Moon drill?

Rigs that effect the Moon Drill come in two sizes,Medium and Large. Moon Drilling Efficiency - these rigs effect the volume of the moon chunk that is pulled from the moon,in relation to the amount of time set for the extraction.

Where is the standup Moon drill I service module located?

Extra rigs and blueprints owned by a corporation will be placed in the Corp Deliveries hangar in the corp HQ station The Standup Moon Drill I Service Module is installed as a regular service module in a structure,taking a Service Module slot,but it is exclusive to Refineries that have been deployed in a valid Moon Mining location.

What is a standup Moon drill?

Standup Moon Drill The Standup Moon Drill is a new service module that can exclusively be fitted to the new Refinery structures. It operates as any normal service module,with an onlining and hourly fuel cost. Fitting it to a Refinery allows a pilot in the gunner position to begin an extraction process using the new extraction scheduling window.
