What is an exploration drill rig?

Exploration drill rigs and equipment designed to deliver the highest level of operational safety and productivity in the toughest environments. The EDM 45K-D is a high performance containerised diamond core drill packed with all the safety features EDM has developed over the last decade.

What is a surface core drill rig?

Our surface core drill rigs are engineered to meet the demands of hydraulic core sample drilling, geotechnical engineering, and exploration drilling projects. With easy transportability in standard container sizes, they are the perfect solution for projects that require quick mobilization without compromising on performance or reliability.

How can exploration drilling companies increase productivity and reduce costs?

Exploration drilling companies are constantly looking for ways to increase productivity and reduce costs. Thanks to our commitment to sustainable productivity, we can match these needs by continuously developing our exploration drilling rigs.

What are the different types of exploration drilling?

There are two main methods of exploration drilling - core drilling and reverse circulation drilling (usually referred to as RC). Core drilling yields a solid, cylinder shaped sample of the ground at an exact depth. Reverse circulation (RC) drilling yields a crushed sample, comprising cuttings from a fairly well determined depth in the hole.

What is a scx110 drill rig?

With a focus on durability and adaptability, Sunny Corner's underground core drill rigs are designed to deliver precision and reliability in even the most demanding exploration and mining projects.
