

Exploring the many advantages of Face Drill Rigs: Face drill rigs are a kind of underground mining equipment which can make holes safely in rock ...

The Boomer E3 (model names XE3 and WE3) is a hydraulic face drilling rigs for medium to large drifts and tunnels with cross sections up to 198 m². Even in the toughest rock conditions, ...

Boomer L1 and L2 are modern hydraulic face drilling rigs suitable for medium sized drifts and tunnels with cross sections up to 64 m². The rigs are equipped with a direct control system ...

The Boomer S10 face drilling rig is engineered for demanding mining and tunneling applications. Its highly durable design ensures precise positioning, rapid drilling cycles and reliable ...

The underground jumbo drill rigs from Epiroc are used for blast hole drilling in underground mining and tunneling. The rigs are equipped with up to four booms, covering cross sections from 6 m² ...

Drilling is the heartbeat of any underground project--and face drill rigs are the tools that keep it going strong. Whether the concise tunneling in the transport industry or the slicing out hard ...

The face drilling rigs are designed for tunnelling and mining applications. With their booms these compact drilling jumbos are capable for various drilling applications, e.g. face drilling, cross-cut ...

GD651 Face Drilling Jumbo Our drill jumbos include wheeled face drilling rigs and tracked face drilling rock drilling rigs. GD651 has drilling diameter of 45-89mm, ...

Durable and reliable rig for face drilling tasks. Performance-proven powerful tool for your continuous and efficient work in mining development and production. ...

This hydraulic tunneling drilling rig is a face drilling rig designed with increased working height, suitable for large hard rock mines and tunnels with cross sections of 12-44m².

Face Drill Rig FOCOR self-propelled drilling rigs are mainly used to drill blast holes for tunneling constructions in mining, metallurgy, water and electricity, railway, highway engineering, etc. ...

The durable and robust Boomer M1D and M2D rigs are hydraulically controlled mining and tunneling face drilling rigs. With the strong BUT 36 S boom, these ...

Boomer S1 D is a modern single-boom, hydraulic face drilling rig which is used in small drifts and tunnels. A

Face drill rig

direct control system (DCS) is provided in the rig. DCS is reliable and robust.

Siton DW1-24 face drilling rig is a compact and flexible rig specially designed for narrow drifts and tunnels. DW1-24 development jumbo can be widely used in underground mining drifts, ...

Face Drill Rigs Z20 Multifunctional Double Face Drilling Jumbo for Full-section Tunnel DW1-24 Single-boom Face Drill Rigs for Underground Narrow Tunnel DT1-14 Crawler Hydraulic Face ...

Our dedicated team is here to provide you with the answers and support you need. Whether you're looking for more information about our products and ...

2 min read E& MJ: Face Drilling's Next Frontier Intelligent, autonomous and emission-free jumbos are the order of the day underground. E& MJ investigates...

Description of Face Drilling Rig: Siton face drilling rigs are used for blast hole drilling in underground mining and tunneling. So our underground drill rigs are widely applied in mining, ...

As a leading supplier of rock excavation equipment for more than 145 years, we have gained considerable experience and knowledge of mining techniques that are practiced across the ...

As a leading supplier of rock excavation equipment for more than 145 years, we have gained considerable experience and knowledge of mining techniques ...

The new booms of the Boomer M20 S jumbo drill rig feature internal hydraulics and a hoseless design. This means less unplanned downtime for hose repairs ...

The first domestically developed curved boom structure, with a small overall size, can meet the construction needs of most section types in tunnels and tunnel construction, especially for ...

What Is a Face Drill Rig? A face drill rig is a transportation machine that works underground in tunneling and mining applications and that drills blast holes into the face of rock.

FOCOR self-propelled drilling rigs are mainly used to drill blast holes for tunneling constructions in mining, metallurgy, water and electricity, railway, highway engineering, etc. The drill jumbos ...

What is face drilling? The term 'face drilling' typically refers to a specific method used in the construction and mining industries, particularly when it comes to tunneling and ...

Boomer S1 L is a low-profile hydraulic face drilling rig suitable for small drifts and tunnels with cross sections up to 29 m². The BUT 28 boom allows for fast, precise positioning with ...

Face drill rig

Durable and reliable rig for face drilling tasks. Performance-proven powerful tool for your continuous and efficient work in mining development and production.

FACE DRILL RIG WD561-N, UNIROC For 4-12m; mining roadway, pumped storage power station, hydroelectric power station, reservoir irrigation hole digging drilling work and anchor hole work.

Epiroc's rugged face drilling rigs are built for blast hole drilling in underground mining and tunneling. Choose your model of jumbo here and read more!
