

Focus energy drilling rig

Who is Focus Energy Limited?

Focus Energy Limited is an independent oil and gas exploration & production company holding two blocks in the Indus Basin and Cambay Basin in India. We hold one of the largest acreage positions in the Indus Basin in Rajasthan, India, which is currently our region of prime focus.

Can electric drilling rigs help energy companies achieve net zero?

Oil and gas operations account for 15% of global energy-related emissions--a situation that leading energy companies around the globe are working diligently to change. But to move toward net zero operations, the industry must have viable alternatives to burning hydrocarbons as fuel. Electrifying drilling rigs can expedite that journey.

How deep do oil rigs go?

The majority of oil rigs in shallower waters are operated by fixed or jack-up rigs, while those operating in waters deeper than 500ft tend to be floating or subsea rigs. Traditionally, drilling into the earth's surface is a very energy, labour and capital-intensive activity. However, this is beginning to change.

How many offshore oil rigs are there?

Today, there are about 270 offshore oil and gas rigs operating worldwide. The majority of oil rigs in shallower waters are operated by fixed or jack-up rigs, while those operating in waters deeper than 500ft tend to be floating or subsea rigs. Traditionally, drilling into the earth's surface is a very energy, labour and capital-intensive activity.

Where is Focus Energy located?

Focus Energy Ltd. 3rd Floor Gopala Tower, 25 Rajendra Place, New Delhi-110008, India. Copyright © 2025 Focusenergy. All rights reserved.

Can drilling rigs be electrified?

As more and more markets' electric grids develop, so does the potential to electrify rigs, increasing opportunities to meet and exceed operational sustainability goals. Onshore drilling rigs need consistent, reliable power to operate efficiently, but they no longer must rely on diesel generators.

In a Denver suburb, an oil drilling rig plumbs the earth near a wealthy enclave framed by snow-capped mountains. The site is quieter, cleaner and less visible than similar oil ...
