

Genesis drilling rig

What makes Genesis a good drilling / production spar?

Genesis is a good drilling /production spar because it is being developed using a cylindrical steel spar that supports both the drilling operations and production facilities. This makes it the world's first drilling /production spar. Air-filled compartments on the upper portion of the cylinder provide buoyancy, while seawater-filled tanks on the bottom give weight and stability.

What is a mining drill in Genesis?

The Mining Drill is a Weapon in the Expansion Pack Genesis: Part 1. The Mining Drill functions as a powerful harvesting tool that aids in the collection of just about nearly every resource from any natural-spawning resource node. Utilizing Gasoline, it fires a laser to drill through the...

What is Genesis?

GENESIS connects suppliers around the world to provide drilling tools at a fair price. GENESIS specializes in Premium Tubulars and pre-owned rig equipment. GENESIS partners with manufacturers to offer lowest costs for new/surplus inventory. GENESIS' founder, EC Gabehart, has dedicated 40+ years to connect & catalyze partners around the world.

How much oil does Genesis produce a day?

The Genesis Oil Field produces up to 8,300 barrels (bbl) per day following drilling and flow tests. The peak production is expected to be about 55,000 bbl of oil and 72 million cubic feet of natural gas per day.

What is the water depth of the Genesis Hull?

The Genesis production facility is moored in water depth of 2,600ft. The Genesis spar platform hull was delivered in June 1998. The Genesis field is located 150 miles south of New Orleans, across the three Green Canyon blocks 160, 161 and 205. The water depth varies from 2,500ft to 3,000ft.

How were the Genesis topsides manufactured?

The Genesis topsides were manufactured as two units: the production deck and the drill /utility deck. Before loadout, the drill /utility deck was cut into two pieces (between truss rows one and two) for easier transportation. The Genesis hull is 122ft in diameter and 705ft-tall.

Since coming online in 1999, Genesis has: Been the first 705-ft, 28,700-ton, floating steel spar to house both drilling and production facilities. ...

The spar's motion characteristics provide longer periods of drilling in rough weather. Typically, storms in the US Gulf with 15-25-ft seas and 35 ...

The Genesis BQ500 is the latest generation, automated onshore hydraulic drilling rig to be manufactured by B
