

Guangwo screw air compressor maintenance password

Who is Guangzhou Guangwo compressor?

Who are we? Guangzhou Guangwo Compressor Co., Ltd. is the first national high-tech enterprise and Guangdong Province specialized and innovative enterprise to successfully develop, research and produce a series of vortex air compressor products in China.

Why should you read the air compressor operation manual?

No one realized fully automatic operation, intelligence operations, and remote control and linkage control. The operation manual is to help users get the best results, must be read carefully before operating. On the proper use and maintenance plan, will extend the service life and reduce air compressor failure.

Do I need a Certified Technician for compressor maintenance?

A certified technician is required to ensure compressors maintenance is safely handled. By following the instructions in this manual, the user will minimize possibility of an accident throughout the useful life of this equipment. Key hazards are used throughout this manual.

How to reduce lubricant pressure in Fangdiao?

Could be reduced when a small part of the gas valve through the keyhole Fangdiao to balance the inlet valve control of the inhaled air holes so that the separation tank to maintain the pressure in the 0.2 ~ 0.3 Mpa, to maintain the normal cycle of lubricants.

How do you check a screw compressor?

Check the set data, voltage, bearings, tubes, and other mechanical system. Screw compressor requires the minimum amount of inspection and maintenance. The controller and indicator alert the operator to perform required maintenance or repair unit problems. Screw compressors are filled & tested with Total lubricant.

How to check if a compressor is working properly?

2? Press the "start" button, the compressor can be work according to the set mode. At this time, observe whether normal of the display panel, pressure temperature, or abnormal sound, oil leakage. If there is abnormal, stop and check immediately. 3? When press the "stop" button, the machine will stop after finishing unloading. It is normal

The machine must be carefully maintained so that the screw compressor or compressor unit can meet various requirements. Therefore, the machine must be carefully maintained according to ...
