When did oil rigs start in the Gulf of Mexico?

Oil platforms in the Gulf of Mexico began appearing in the 1940s and became more elaborate, complex, advanced and multi-purpose structures with the passage of time. The initial oil rigs were small and were used to extract oil from the nearshore wells. In the 1970s, bigger platforms were being constructed in deeper waters.

How many abandoned oil rigs are in the Gulf of Mexico?

The Gulf of Mexico is home to over 4,000 abandoned oil rigs. The majority of these oil rigs were abandoned between the late 1970s and early 1990s when oil prices plummeted below \$10 per barrel and the offshore drilling industry went into decline. Many of these rigs were simply abandoned, leaving them to rust and fall apart.
