

Horizon drilling rig 14

How many drilling rigs does horizon have?

Horizon operates one of the newest drilling rig fleets in the WCSB. Seventeen of Horizon's rigs have been built new since 2011, allowing the integration of some of the newest and most modern technology available.

Where did Deepwater Horizon oil rig burn?

The Deepwater Horizon oil drilling rig burning at a well in the Gulf of Mexico in April 2010. Gerald Herbert/Associated Press

Who is Horizon drilling?

Horizon Drilling has one of the newest fleets and is the 4th largest drilling contractor in Canada. We honour environmental stewardship by following standards from Oil and Gas Drilling and Production regulators. With proper equipment maintenance, we reduce ecological impacts and are mindful of communities by protecting the shared environment.

What oil rigs did Deepwater Horizon work on?

Deepwater Horizon worked on wells in the Atlantis (BP 56%, BHP 44%) and Thunder Horse (BP 75%, ExxonMobil 25%) oil fields. It was described at times as a "lucky" and "celebrated" rig, and in 2007 was still described as "one of the most powerful rigs in the world".

Why did the Deepwater Horizon rig explode?

The central cause of the explosion aboard the Deepwater Horizon drilling rig was a failure of the cement at the base of the 18,000-foot-deep well that was supposed to contain oil and gas within the well bore.

What is Horizon's newest rig?

Horizon's newest rig is an AC Triple Pad rig with a depth capacity of 6,000 metres (19,600') and a high-pressure circulating system rated for 52,000 kPa (7,500 psi). A truly unique next-generation rig incorporating some of the latest technologies available. Click on the video here to see an animation of this rig and its moving system capabilities.
