

How long should rigid 12 v battery last in drill

What happens if you use a 20V battery in a 12V drill?

You are more likely to damage the 12V drill because it was not designed to contend with the output of a 20V battery. You can use a 20V battery in an 18V drill because 18V and 20V drills are, more or less, the same.

How long does it take to charge EPC 18 volt battery?

After normal use, a charging time of 3 hours will provide sufficient power for most applications. However, further charging for up to 6 hours could significantly increase the use time, depending on the battery and charging conditions. I have the EPC 18 volt and my instructions says the same, up to 8- 10 hours the battery will be fully charged.

How long does it take a battery to charge?

After approx. 3 hours of charging, the battery will be sufficiently charged for use in regular applications. After approx. 8-10 hours of charging, the battery will be fully charged. After a few lines, it says: After normal use, a charging time of 3 hours will provide sufficient power for most applications.
