

How many drill rigs are in the eagle ford shale

How many oil rigs are in Eagle Ford?

Baker Hughes counted 71 active rigs in the Eagle Ford during the week ending March 3, with 68 of them drilling for oil. That was 17 more active rigs than during the same week of 2022. Even though there are fewer rigs targeting gas, the number of oil-directed rigs was up by a solid 23 year over year.

Does Eagle Ford Shale have a specific spread compared to 2023?

The specific spread compared to 2023 is not available. The Eagle Ford Shale remains a crucial component of U.S. oil and gas production, with operators like ConocoPhillips, EOG Resources, and Crescent Energy leading the charge in drilling activity.

Is the Eagle Ford Shale a good investment?

The Eagle Ford Shale may be one of the more mature U.S. onshore resource plays, but operators see plenty of upside running room ahead. Current production trends reflect their optimism, buoyed by a fresh round of asset acquisition deals and evolving new well drilling and producing well refracturing programs.

How many wells did EOG drill in Eagle Ford in 2024?

EOG Resources drilled 186 wells in the Eagle Ford in 2024, securing its position as one of the leading operators in the basin. The company drilled 70 fewer wells compared to 2023, showing a notable drop in activity. 3. Crescent Energy Inc Crescent Energy drilled 106 wells in the Eagle Ford during the year, an increase of 20 wells compared to 2023.

Which shale basin has the least drilled wells?

That is because the Eagle Ford region now has the fewest number of drilled but uncompleted wells of any of the seven major oil or gas producing horizontal shale basins. That was not the case one year ago, when the Eagle Ford's 657 DUCs ranked third behind only the Anadarko Basin and mighty Permian Basin.

Is the Eagle Ford Shale a hotbed of activity?

The Eagle Ford remains a hotbed of activity, and the companies listed here are playing a major role in shaping its future. The Eagle Ford Shale has remained one of the most prolific oil and gas-producing regions in the United States, with several major operators continuing to drill aggressively throughout 2024.
