How do you loosen a drill rod?

Loosening stage: after clamping the two drill rods, drive the unloading rod cylinder to rotate the upper and lower clamping cylinders relative to each other by a certain angle to loosen the threaded connection between the two drill rods.

How do you drill a deck?

correct footing on deck area. 12. Driller to engage winch lever upward and once rod is clear of string lower rod kicker and lower rod down to d rack to unscrew hauling plug. Ensure offsider has correct grip on drill pipe and is standing with rod in between himself and driller so driller has a clear view at all times. 13.

What is a down-the-hole drill?

In mining, tunneling, and geotechnical engineering, down-the-hole drills are core equipment, and their operating efficiency and stability are directly related to project progress and cost control.

How to install a drill rod unloader?

Preparation stage: first, open the clamps above the rod unloader seat. Then, position the drill rod to be connected to the rod unloader, ensuring that the upper and lower drill rods and the swivel head main shaft are all aligned concentrically with the drill rod to be connected.

What's more, depending on the angle at which the drill rods enter the ground, as much as 15 feet of drill pipe may be exposed between the front ...
