

# How to disassemble the screw air compressor of the paint sprayer

What is air compressor spraying?

Air compressor spraying means using an electric air compressor to propel the paint onto the surface. There are three options for power-coating: compressors, airless sprayers, and turbines. Turbines are more affordable and use an internal fan to drive your paint. However, airless machines (hydraulics) use a piston pump to propel the liquid.

Should you use a compressor to paint a sprayer?

The main downside of paint sprayers with compressors are portability and cost. This method requires some initial investment. Along with the paint, you need a regulator, air hose, compressor, and gun. With that, compressor-driven painting isn't ideal for some jobs. Compressors can be heavy, oily, and bulky.

How do you connect a spray gun to a compressor?

Connect your hose to the compressor and gun. Use the right connector for the attachments. Modern guns often use quick-connect fittings that have a gasket to stop air leaks. Turn on your compressor and set it to the right pressure level. Some HVLP spray guns use an in-line regulator so that you can step-down the pressure for the shooter.

Can you use a paint sprayer with a mini air compressor?

Other disadvantages can include: Here's how to use paint sprayers with a mini air compressor: Choose a spray gun for the paint job and find a compressor that's compatible with that tool. Make sure to think about the size of the project, the coating medium you use, and the finish you want.

How do compressor sprayers work?

And, compressor sprayers -- or pneumatic sprayers -- feature an external compressor to knock out your covering material. And that's the key -- this style of painting requires an additional powerhouse. Turbines and airless sprayers, whether handheld or with an external motor, are complete off-the-shelf machines.

Are spray guns compatible with air compressors?

No. The nozzle design and internal chambers are not compatible with a compressor. Plus, there's nowhere to fill the paint or connect the air hose -- making them irrelevant. Instead, check out the Best Spray Guns for Air Compressors.
