

How to install the dust bag on a down-the-hole drill

How do you install a hole saw dust bowl?

Installation is quick and requires no adjustments. Just put the Dust Bowl between your drill chuck and hole saw arbor and start drilling. Perfect for overhead drilling and recessed light installs, this hole saw debris collector will keep your work sites clean, customers happy, and lungs and eyes healthy.

Can you drill multiple holes in a drill bag?

Drill your first hole. If you need to drill multiple holes and you have used good tape, you can carefully detach the bag after drilling the first hole and then attach it again below the second marker to drill the second hole, third hole, etc. If you keep the bag upright, you will not spill any drill dust on the floor.

What is a drill dust bowl?

Driller's Dust Bowl is a flexible rubber bowl that attaches to your drill to catch all dust and debris. This hole saw dust bowl compresses against ceilings or walls to form a tight seal. Installation is quick and requires no adjustments. Just put the Dust Bowl between your drill chuck and hole saw arbor and start drilling.

Is it bad to drill a hole in the wall?

Drilling a hole in the wall is not really fun, but more annoying than the drilling itself is that you need to get all your furniture out of harm's way and clean up the dust afterwards. Now there are several drill dust collectors available in commerce, ranging from plastic bubbles all the way up to tiny vacuum cleaners.

What is a hole saw dust bowl?

Driller's Dust Bowl is a flexible rubber bowl that attaches to your drill to catch all dust and debris. This hole saw dust bowl compresses against ceilings or walls to form a tight seal. Installation is quick and requires no adjustments. Just put the Dust Bowl between your drill chuck and hole saw arbor and start drilling.

How do you attach a dust collector to a wall?

Take another piece of tape that's almost the length of the paper and attach it to the top edge of your paper. This will be used to attach your bag to the wall. Mark the spot (s) where you want to drill your hole and attach the dust collector just underneath the first spot. Drill your first hole.
