

# How to write a construction plan for a drilling and blasting project

How does bpwe develop a blasting plan?

BPWENA will develop a detailed blasting plan (if required) once geotechnical investigations are completed. Prior to any explosive work beginning, a detailed blasting plan will be developed which outlines the procedures and methods that will be used. This plan must be submitted to BPWE for approval. At a minimum it must include the following:

What should be included in a blasting plan?

The blasting plan(s) shall include, but not be limited to, the following: Location, depth, area, anticipated excavation lines and relationship to specified dimension lines, adjacent excavations and work. Diameter, spacing, burden, depth, pattern and orientation of blast holes.

What is a blasting plan?

**BLASTING PLAN** This Blasting Plan describes the blasting operations that may occur during construction of the 650 Project.

How do you prepare for a blast?

In preparation for the blast, the blasting crew will secure the area a safe distance from the blasting zone, 1/8 mile as a minimum. This perimeter will be maintained by manning a truck with flashing beacons across all roads leading to the blasting area.

When should a blasting plan be submitted?

The Blasting plan(s) shall be submitted separately for review by the Employer not less than 30 days prior to starting a new phase of work a proposed blasting plan(s) as per Employer Requirement section 2B.3.7.1 Blasting Submittals.

How do you prepare a blasting specification?

Ensuring that risk assessments are in place for all blasting activities, even though they may be assessed by others. Marking out shots prior to drilling. Surveying shots, or ensuring information provided by a separate surveyor is adequate for use preparing the blasting specification. To prepare explosives for immediate use.

This objective is normally achieved by minimizing and making judicious use of explosives in the blast holes. Techniques such as line drilling, pre-splitting, smooth blasting, and cushion ...

While it is possible to write a borehole drilling business plan on your own, it is highly recommended to work with an experienced professional. A professional ...
