

# Is it illegal to sell excavators and down-the-hole drills

Should you sell a hole or a drill?

A common cliché in sales training is "Sell the hole, not the drill." This maxim stems from the idea that if a person is buying a drill, it's not because they really want a drill, but because they want a hole. And you should focus on the problem they want to solve, rather than your product. For example: o What do they need to put a hole in?

Can you sell heavy machinery without a title?

While it is advisable for operators to maintain current certifications to ensure safety and efficiency, there are no legal obligations when it comes to selling or transferring heavy machinery. However, potential buyers may prioritize certified equipment for their own operational purposes. If There's No Title: Can I Get Insurance?

Can a company drill under your land without a lease?

As you scramble to understand how this could happen, you realize that the company is claiming they have the right to drill under your land without a signed lease. This unsettling situation raises numerous legal and ethical questions about property rights and corporate responsibility.

Can an oil company drill without a landowner's consent?

One such situation is when the oil company already holds the mineral rights to the land. If the mineral rights severed from the surface rights were never reunited with the surface rights, the oil company may have the legal authority to drill without the landowner's consent.

Can I have insurance if my equipment has no title?

Yes, you can have insurance even if your equipment has no title. The insurance company will conduct an inspection and gather all the information they need before getting your policy. Murphy's law states, "if something can go wrong, it will go wrong."

Do you need to sell a drill?

And even if a drill is the obvious answer in their mind, they don't necessarily need to buy one. They could conceivably borrow one from a friend, relative, or neighbor. So you actually need to sell the drill. Which is largely guiding them to the right drill for them, based on their needs, budget, and preferences.
