

JULIS screw air compressor password

What is a user manual for the mam-880 screw air compressor controller?

This document provides a user manual for the MAM-880 screw air compressor controller. It describes the controller's features such as Chinese/English display, remote/local control, block/independent modes, motor on-off control, temperature measurement and protection functions.

How do I Reset my compressor?

When compressor is set as master (No.1) in block status ,press this button to start the compressor and activate block mode function at the same time. When cursor is at any page icon, press this button to execute the corresponding function. When the controller is at alarm and stop status, press this button for 5s to reset.

How does a screw compressor work?

A screw compressor can run loaded ('pumping air') or unloaded ('idle'). The inlet/loading valve opens and closes according to air demand. The inlet valve is controlled by a solenoid valve that supplies control air to the inlet/loading valve. Check solenoid valve coil and solenoid valve operation.

How do I start a compressor?

When compressor is at stop status, press this button to start the compressor. When compressor is set as master (No.1) in block status ,press this button to start the compressor and activate block mode function at the same time. When cursor is at any page icon, press this button to execute the corresponding function.

How do I know if my air compressor is working?

If you have a compressed air dryer, check the dewpoint. Check the current draw with a current clamp meter. If the motor draws excessive current: Try to turn the compressor by hand. It should be possible to turn it around. It should turn around smoothly, without any 'hiccups' (be sure to completely shut down the air compressor!).

What should I do if my air compressor is too low?

If the capacity of the air compressor is really too low, check the following: Check differential pressure over oil separator. Replace separator when necessary. Check and replace compressed air filters (if installed). Compressor does not unload. Check if pressure switch is correctly set and working.
