Why is my Jaguar X350 air compressor not working?

The first possibility that comes to mind is that the air suspension control module has entered Jacking Mode, which disables the air suspension compressor. On the Jaguar X350, driving the vehicle over 2 or 3 mph will exit Jacking Mode, re-enabling the air suspension. However, the air compressor will not run until vehicle speed exceeds 25 mph.

Why is my air compressor jamming?

The jamming of the screw air compressor head is caused by several factors. Let's analyze the reasons first: 1. The first is insufficient lubricating oil.

What happens if a air compressor head is moved?

If it can be easily moved, it means that it needs to be replaced; Overhaul of the bearing of the air compressor head will inevitably produce wear as the running time passes, which will cause the axial movement and radial movement of the screw to increase. This change will cause the screw and the screw, the screw and the host casing to increase.

Can I buy Jaguar air compressor from China?

Please take photos or videos to Jaguar air compressor after service person, also you could contact us.
