

Bertha, the largest boring machine in North America, has reached the light at the end of the tunnel, after getting stuck, and sitting motionless ...

Tunnel boring machines enable safe, efficient, precision boring of underground tunnels through a vast range of geological conditions. This guide provided an overview of how ...

China has built the world's largest tunnel-boring machine that weighs 10,000 tons and uses an ancient Chinese swordmaking technique.

The Jiangnan Ping'an Tunnel Boring Machine (TBM) began operations earlier this month on January 5th, on what might not only be ...

The City of Dallas unveiled the Big Tex tunnel-boring machine (TBM) at the Mill Creek Drainage Relief Tunnel. The 38-ft by 230 ft long ...

In today's age of infrastructure growth and rapid urbanisation, building tunnels for metro systems, highways, water supply, and sewage projects has become essential. Among ...

The tunnel will become a double-decker highway, scheduled to open in 2019 It was in April of 2013 that the 57-foot wide boring machine arrived in Seattle ...

A Tunnel Boring Machine (TBM) is a large, complex piece of equipment used to excavate tunnels through various soil and rock conditions. It features a rotating cutter head ...

Tunnel boring machines are specialized equipment designed for excavating tunnels with precision and efficiency. They are capable of boring through various types of ...

Tunnel boring machines carve through solid rock. Conveyor systems move heavy materials with ease. Shotcrete machinery strengthens tunnel walls, and Rockwheel ...

Powerful tunnel boring machines excavate, remove materials, and install walls. The world's largest measures 17.63 m. Here are the five biggest ...

Here is the list of Top 10 Biggest Tunnel Boring Machines in the World, Massive next-generation tunnel boring machines that can dig rock walls, remove the material, and place concrete ...

To fundamentally alleviate the excavation chamber clogging during slurry tunnel boring machine (TBM)

Large tunnel boring machine

advancing in hard rock, large-diameter short screw conveyor was ...

China's largest-diameter dual-shield, self-developed TBM (Tunnel Boring Machine), the "Jiangnan Ping'an," was launched on Sunday in ...

Tunnel Boring Machines are key in today's construction. They affect tunnel digging costs and overall project expenses. Let's dive into the world of TBMs and their role in ...

On April 4, the world's largest tunnel boring machine broke through to the open air after almost four years underground. Called Bertha, the giant ...

On 9 May 2025, AECOM attended the launch ceremony of Singapore's largest tunnel boring machine (TBM) to date -- a major milestone for the Cross Island Line Phase 2 project (CR202 ...

NFM Technologies For more than 20 years, NFM Technologies has been designing and manufacturing large diameter tunnel boring machines ranging from 4 m to more than 15 m, ...

The largest tunnel boring machine (TBM) in the world when it was built, Bertha weighs a gargantuan 6,700 tons and stretches 326 feet long.

OverviewNameDesign and assemblyExcavationControversySee alsoExternal linksThe name Bertha, after Seattle's first female mayor, Bertha Knight Landes, was chosen by a panel (that included the Governor and Transportation Secretary) from 150 submissions from kindergarten through 12th graders, who were asked to submit female names with Washington state heritage. The winning entry, which was submitted by two elementary schools in Poulsbo and Hoquiam, was selected in December 2012.

Tunnel Boring Machine (TBM) have revolutionized the approach to tunnel construction providing a precise and efficient mechanized solution.

On June 8, 2020, the largest tunnel boring machine (TBM) built and used in Europe crowned its tunnelling mission with a mighty breakthrough. With this project milestone, the ...

Big Bertha was manufactured and supplied by the Hitachi Zosen Corporation to Seattle Tunnel partners for the SR 99 tunneling project. It measures 57.2 feet (17.5 m) in ...

Such machines have to be pressurized to prevent the tunnel flooding, and line the walls behind them with a watertight combination of grout and precast interlocking concrete blocks. The ...

Tunnel Boring Machines (TBMs) are large, specialized equipment used to excavate tunnels through various soil and rock conditions with minimal disturbance to the ...

Large tunnel boring machine
