

## Leiv eiriksson drilling rig

Is Transocean retiring the Leiv Eiriksson semi-submersible rig?

The rig owner has also decided to retire the Leiv Eiriksson semi-submersible rig. In a fleet status report published last Friday, Transocean said that, as of 12 February, the company's total backlog was approximately \$7.8 billion.

What happened to Leiv eiriksson's sister rig?

It is also worth reminding that Transocean also retired Leiv Eiriksson's sister rig, Eirik Raude, back in February 2019 as the rig's reactivation costs were deemed too high. Both rigs were taken over by Transocean through the acquisition of Ocean Rig.

Is Eirik Raude still a rig?

As for the Eirik Raude's older sister-rig, the Leiv Eiriksson, the 2001-built unit is still going strong. Transocean last week said had won a one-well option for the rig in the Norwegian North Sea. The rig is currently on contract with Lundin until April 2019.

How long does it take to reactivate the Eirik Raude rig?

The Eirik Raude rig was to be reactivated and delivered to Valiant "within twelve to fifteen months." However, just days later the Ocean Rig and Valiant said the deal was off, without providing further details. As for the Eirik Raude's older sister-rig, the Leiv Eiriksson, the 2001-built unit is still going strong.

Will Eirik Raude rig be sold for scrap?

After being stacked for over two years, the Eirik Raude semi-submersible drilling rig is set to be sold for scrap, as the new owner Transocean feels the reactivation costs would be too high. By Bartolomej Tomic
